

SUSPENSION BRAKES COOLING

OVAL TRACK RACING

AFCO Over 35 Years of Performance

WHO WE ARE

AFCO is an engineering-based manufacturing company staffed by experienced professionals who are passionate about the racing industry. AFCO started with a simple need for a better suspension component. Now, after more than 35 years, we have grown into a full-service manufacturing and distribution company that builds industry-leading suspension, cooling and brake components. Our products are distributed by the finest automotive aftermarket chassis builders, warehouses, and retailers throughout North America, Europe, Australia, and New Zealand. Three decades of working closely with racers and tuners has yielded a team focused on delivering superior performance, quality, and value in every product we make.

PREMIER DESIGN & ENGINEERING

Our great products start with the best design and engineering people. Our engineering team is one of the most experienced in the industry. AFCO products are known for reliability, performance, value and innovation. Before we ever release the first iteration of a new product, we use a combination of vehicle data collection tools, extensive CAD modeling, finite element analysis testing, laboratory testing, and extensive field trials to make sure you are getting the best product for your money. We spend countless hours on the road testing and refining our products at the tracks with our customers so you can be sure our products will work as advertised every time!

MANUFACTURING EXCELLENCE

Our experienced, dedicated manufacturing personnel use automated production machines such as CNC benders, CNC lathes and mills, and laser cutting equipment to give us the ability to produce the highest quality, most consistent products in our industry.

UNRIVALED CUSTOMER SERVICE & TRAINING

We understand the needs of our customers and we respond with outstanding technical support and customer service. Shock schools, chassis seminars, product training, fast, and friendly service are all part of what you get when you purchase AFCO products.

WINNING PRODUCTS

The common thread that ties all AFCO products together is performance. AFCO products are built to perform because we love it when our customers win! Our unrelenting passion to be the best is the reason professional racers have relied on AFCO products for over 35 years!

CUSTOMIZATION YOU CAN COUNT ON

We strive to meet our customer's specific needs. We can often build to your custom specifications. We look forward to fulfilling your custom orders.

COREY EARL

NEW WIRELESS ELITE PRO SCALES

- Completely redesigned for 2024 with the latest Bluetooth 5.0 technology to ensure a hassle-free user experience.
- Extended Bluetooth connectivity provides increased range in any setting, indoor or outdoor.
- Effortlessly connect your scales to your Android or iOS device with a simplified, but secure, pairing process.
- Longacre's most feature-packed scale system to date! Taking measurements has never been more efficient and convenient.
- View live weight and saved data simultaneously on the main, user-configurable screen including corner weights and partial percentages.
- Benefit from additional note-taking, organization, ride-height, and alignment pages.
- Extended memory capacity saves all setup data and allows effortless data export through email or file-sharing using the wireless device.
- Monitor battery status of all 4 pads directly from the app.
- Complete system includes: Android tablet, 15" x 15" low-profile pads with a durable powder-coated finish, storage case, and batteries.
- Pre-configured system is ready to use out of the box with the new and improved Longacre Connect app for Android and iOS, offering free app updates.
- Longacre's internal bridged pad design ensures precise readings by eliminating pad flex, providing accurate measurements even with off-centered loads.

PISTONS REPLACEMENT PARTS

NEW 46MM LINEAR/DIGRESSIVE VELOCITY DEPENDENT PISTON

551001298 - \$74.99

Features include an internal shim stack design for better control, radius dished surface for better sealing and better zero points, and internal fluid passages to eliminate shim sticking, guaranteeing consistent and reliable performance every time.

NEW 46MM DIGRESSIVE/DIGRESSIVE VELOCITY DEPENDENT PISTON

551001299 - \$74.99

Features include an internal shim stack design for better control, radius dished surface for better sealing and better zero points, and internal fluid passages to eliminate shim sticking, guaranteeing consistent and reliable performance every time.

46MM LINEAR STANDARD PISTON

550000682 - \$85.99

AFCO Racing's 46mm Billet 3 Port Linear/6 Port Linear Piston, machined with precision on advanced 5-axis CNC equipment, offers peak performance and consistency. Rigorously tested in-house, it guarantees quality and reliability for demanding conditions.

3 PORT LINEAR PISTON

550001139 - \$85.99

AFCO's 46mm Billet 3 Port Linear/3 Port Linear Piston excels in delivering optimal performance by strategically reducing flow to achieve desired damping curves. Each piston is subjected to rigorous deburring and a comprehensive 100% inspection process, ensuring consistent and reliable performance.

46MM LINEAR/DIGRESSIVE PISTON

550000934 - \$85.99

AFCO's 46mm Billet 6 Port Linear/Digressive Piston is machined with precision CNC equipment to guarantee top-tier performance. With anodized billet aluminum construction, 100% inspection, and precision deburring, this piston delivers consistent damping curves, featuring high flow rebound for flatter digressive performance.

3 PORT LINEAR/DIGRESSIVE PISTON

550001140 - \$85.99

AFCO's 46mm Billet 3 Port Linear/Digressive Piston, meticulously crafted with the latest 5-axis CNC equipment, guarantees peak performance. Featuring anodized billet aluminum construction, precision deburring, and 100% inspection, this piston strategically reduces linear flow to achieve precise and consistent damping curves.

AFCO SUSPENSION

ULTRA LIGHTWEIGHT BLACK COATED SPRINGS (2-5/8" ID)

You asked for it and AFCO delivered! Responding to market demand, now you can run high-quality AFCO springs and still get that "blackened out" look!

- AFCOIL® Springs with black coating.
- Get the performance you are looking for with the tightest tolerances in the industry.
- All AFCOILS® are manufactured using ultra-high tensile wire.
- These springs are guaranteed not to lose more than 1% of free height.
- Engineered design resists spring lean and bow.
- Best warranty in the industry!

SUSPENSION

TAKE-A-PART LOW FRICTION BALL JOINTS

- Take-a-part design.
- Low friction design.
- Multiple pin lengths and tapers available.
- No special tools required to assemble or disassemble.
- IMCA legal.
- Simple 3-piece design.

- Improves weight transfer.
- Frees up suspension for more consistent, repeatable chassis tuning.
- Precision-machined to tight tolerances, providing consistent resistance throughout the travel of the ball joint, to deliver consistent performance.
- Road inputs are controlled more effectively by the shock and spring instead of the tire, which improves traction.
- Removes suspension bind and allows shock & spring to have more precise wheel control.
- Meets or exceeds standard ball joint strength.
- Provides more accurate setups during vehicle scaling.
- Lower input steering efforts and faster steering wheel return.
- Extended lengths will raise roll center and improve camber curves.

LOW FRICTION BALL JOINTS

AFCO's low friction ball joints are designed with 2 ft. lbs. of resistance, the force required to move the stud of the ball joint. Compare this with standard replacement joints, with as high as 50 ft. lbs. of resistance.

- **Only 2 ft. lbs. of resistance and less bind = lower lap times.**
- Road inputs are controlled more effectively by the shock and spring instead of the tire, which improves traction.
- Precision-machined to tight tolerances, providing consistent resistance throughout the travel of the ball joint, to deliver consistent performance.
- Frees up suspension for more consistent, repeatable chassis tuning.
- Removes suspension bind and allows shock and spring to have more precise wheel control.
- Meets or exceeds standard ball joint strength.
- Improves weight transfer.
- Provides more accurate set-ups during vehicle scaling.
- Stock appearing.
- Lower input steering efforts and faster steering wheel return.
- Extended lengths will raise roll center and improve camber curves.

STEERING SHAFT MOUNT	30380	\$26.99

AFCO BRAKES

PEDALS

6.25:1 REVERSE DUAL SWING PEDALS

- Extra-long bias adjuster to allow even more adjustment.
- H-beam forged aluminum pedal design.
- Ultra high strength bias bar; same strength of 7/16" bias bar in the traditional 3/8" size.
- New snap ring gives more bias rod clearance and eliminates thread interference.
- Ultra-strong upper mount has 52% less flex than the competition.
- Rounded clevis design prevents bias-bar lock-up at extreme limits of travel.
- Integral bias bearing stops prevent lock-up when adjusting bias.
- Internal hex in bias bar eases bias set up.
- 6.25:1 Pedal ratio.
- 4.36 lbs.
- AFCO master cylinders sold separately (see page 30).

Exclusive bias "tie-bar" adds strength and sets clevis spacing for proper master cylinder function.

DESCRIPTION	PART #	PRICE
REVERSE DUAL SWING BRAKE PEDALS	6610000	\$349.99

6.25:1 FORWARD DUAL SWING PEDALS

- Extra-long bias adjuster to allow even more adjustment.
- H-beam forged aluminum pedal design.
- Ultra high strength bias bar; same strength of 7/16" bias bar in the traditional 3/8" size.
- New snap ring gives more bias rod clearance and eliminates thread interference.
- Ultra-strong upper mount has 52% less flex than the competition.
- Rounded clevis design prevents bias-bar lock-up at extreme limits of travel.
- Integral bias bearing stops prevent lock-up when adjusting bias.
- Internal hex in bias bar eases bias set up.
- 6.25:1 Pedal ratio.
- 4.36 lbs.
- AFCO master cylinders sold separately (see page 30).

Exclusive bias "tie-bar" adds strength and sets clevis spacing for proper master cylinder function.

DESCRIPTION	PART #	PRICE
FORWARD DUAL SWING PEDALS	6610001	\$349.99

7:1 FORWARD SINGLE SWING PEDALS

- H-beam forged aluminum pedal design.
- Pedal assemblies fit Rocket Chassis, Black Diamond, and Longhorn chassis.
- Allows for positioning of the clutch pedal to be away from the driver for better comfort.
- New snap ring gives the brake pedal more bias rod clearance and eliminates thread interference.
- Ultra high strength bias bar on brake pedal; same strength of 7/16" bias bar in the traditional 3/8" size.
- Rounded clevis design prevents bias-bar lock-up at extreme limits of travel.
- Integral bias bearing stops prevent lock-up when adjusting bias.
- Internal hex in bias bar eases bias set up.
- 7:1 Pedal ratio allows for better braking power.
- Brake pedal weight: 2.36 lbs.
- Clutch pedal weight: 1.64 lbs.
- AFCO master cylinders sold separately (see page 30).

AFCO BRAKES

MASTER CYLINDERS

INTEGRAL RESERVOIR MASTER CYLINDER

The AFCO engineering team started with a clean sheet when designing our master cylinders. AFCO's master cylinders offer the same great performance that customers have come to expect from AFCO. With a one-piece design that incorporates a high-capacity reservoir and precisely machined/polished cylinder bore, the piece makes efficient use of space and materials.

- External return spring maintains positive pedal feel and helps prolong pad life by ensuring quick reaction to released pedal force.
- Precise-fitting lid held firmly in place by heavy gauge retainer.
- Slim design rubber boot allows easy installation into most pedal assemblies.
- Aluminum bore with hard anodized pistons.
- Unique, built-in minimum and maximum fill tabs are easy to read and make quick work of checking fluid even in dark pit areas.
- Common dual-mounting bolt patterns for most racing applications.
- Models come in 3/4", 7/8", and 1" bores.
- Designed for standard 1/8" NPT fittings for easy replacement.

External return spring.

Fluid level indicator marks.

DESCRIPTION	PART #	PRICE

AFCO BRAKES

BRAKE PADS

AFCO proudly offers its line of racing and high performance brake pads. These brake pads have gone through extensive development and testing in the toughest racing environments. Our racing brake pads are derived from the latest materials in friction products and utilize the latest technologies in brake pad manufacturing.

- Improved stopping power.
- High torque with excellent control qualities.
- Exceptional high temperature performance.
- User friendly/easy break-in.
- Exceptional pad and rotor wear.
- Available in C1 and C2 compounds.

COMPOUND C1 LESS AGGRESSIVE

6651011 \$200.99

This compound was designed and developed to meet the braking needs of medium to high temperature racing applications. As brake system temperatures quickly increase and decrease, C1 provides consistent performance while remaining very fade resistant. C1 has proven to be extremely rotor friendly and provides exceptional pad life without requiring lengthy pad break-in (bedding) procedures. C1 is widely used in dirt track racing and is the ultimate pad choice for all medium temperature applications. Recommended temperature use: 400 to 900 degrees.

COMPOUND C2 MORE AGGRESSIVE

6651021 \$200.99

Compound C2 - This compound provides exceptional high temperature performance. C2 is designed to withstand wide-ranging temperature changes, giving the driver predictable pedal feel and excellent control qualities lap after lap. C2 is high in torque value yet has very long pad wear. Compound C2 is the perfect choice for all higher temperature applications. Recommended temperature use: 500 to 1200 degrees. The C2 compound is designed for a wide range of temperatures and provides excellent cold bite while allowing aggressive brake power. Best used on: F88 or standard SL style caliper. Rear of dirt late models. Front of asphalt late models. Sprint cars using steel non-drilled inboard rotors

**THE AFCO BRAKE PAD FITS IN AFCO'S NEW F88
CALIPER OR A STANDARD SL STYLE CALIPER.**

HIGH PERFORMANCE BRAKE FLUID

HIGH PERFORMANCE HTX BRAKE FLUID

The HTX fluid has been engineered to meet the demanding requirements of super late model (dirt and asphalt) as well as dirt modified and "outlaw" open wheel modified racing. HTX fluid offers superior performance where high brake system temperatures for an extended time period are experienced. AFco High Performance Brake Fluid will exceed your expectations!

- Dry boiling point of 600°+.
- A "must have" for asphalt cars.
- Non-silicone fluid.
- Sealed in steel can for longer shelf life.
- Best value in brake fluid on the market.

HIGH PERFORMANCE HT BRAKE FLUID

Better performing brake systems start with superior brake fluid. The HT fluid has been designed to provide enhanced performance for applications ranging from street stocks to open wheel modifieds to drag racing and is value priced. AFco HT Brake Fluid will out-perform comparable fluids.

- Dry boiling point 500°+.
- Non-silicone fluid.
- Eliminates brake fade due to fluid failure caused by heat.

DESCRIPTION	PART #	PRICE
HTX SINGLE 16.9 OZ. CAN	6691903	\$25.99

AFCO COOLING

ALUMINUM RADIATORS

Every AFCO radiator is built from detailed, computer-designed specifications and use precision CNC laser-cut parts for exact tolerances. We never stamp tanks. Our tanks are either laser-cut and precision-welded or formed using a "drawn" technique that keeps a uniform thickness and eliminates weak spots.

AFCO understands the vital role the radiator plays in protecting the investment you have in your car. That is why we make no excuses or compromises in constructing the best aftermarket radiators in the industry. Don't trust your pride and joy to anything less than AFCO quality!

FROM CORE TO FINISHED PRODUCT...

MADE BY EXPERTS

Quality control and strict production tolerances are key to developing a premium product. Controlling these aspects in-house means AFCO radiators are produced to the highest standards without compromise.

100% ALUMINUM CONSTRUCTION

By using a modern furnace-brazed process, all AFCO radiators feature all-aluminum construction without the need for epoxy. Not only does this make for a lighter radiator, but the common material bonding provides for increased thermal efficiency as well.

ADVANCED MANUFACTURING

Our robotic welding cell for high volume production features a new Fanuc Robot and CMT technology. We also have water jet, laser cut, CNC brake and other capabilities. Our engineering professionals use the most advanced platforms, such as CREO, to design the most innovative products in the industry.

PREMIUM QUALITY

AFCO produces high quality radiators and cores. These cores are epoxy free and defect free. Each part goes through our stringent quality control process. We pressure-test every one of our radiators to ensure that our customers will keep their cool on the track.

SPECIAL APPLICATIONS

In-house design and fabrication allows us to conceptualize, prototype, test, and manufacture custom cooling systems for a wide variety of applications. If you have a specialty radiator need, AFCO can deliver.

STATE-OF-THE-ART ALUMINUM BRAZING

FURNACE SPECIFICATIONS

30" Wide Belt
8" Pass Height
18-22 Cores/Hour

STAINLESS STEEL "HOTBOX" DATA RECORDER

Brazing profiles are created for each core based on the total mass weight. The furnace temperatures and belt speeds are adjusted based on feedback from a data recorder. The hotbox ensures a quality braze profile for each core.

FURNACE CONTROLS

The furnace is controlled via a touch screen HMI panel. Each component uses a unique brazing profile that is developed and saved as a recipe. This recipe includes belt speed, zone temperatures, and nitrogen flow. The system software also provides features such as historical brazing data and maintenance scheduling.

OUR CORE STANDARDS

Every part of a core is important, but the quality of the headers is an absolute must. The tube slots must be punched with a maximum of .002" clearance for a precise tube fit. While others use single sided clad material, AFCO uses double sided clad for all the headers. This provides a fillet joint around the tube on both sides of the header, doubling the strength of the joint. You simply cannot build a better, stronger core. The use of .080 double clad material and extruded side channels provides a core strong enough to handle over one million pressure cycles, without a tube-to-header joint failure.

DOUBLE PASS RADIATORS

AFCO double pass radiators give increased cooling over standard type radiators, with less than 2 oz. of added weight. Common temperature drops are 10-20° F when replacing a standard configuration radiator with equal core size. This keeps your mind off the water temperature and puts it on the race track.

HOW IT WORKS

Double pass radiators gain their efficiency by first passing the fluid through the top half of the radiator and then the bottom half, giving the radiator the ability to dissipate heat twice.

We use our exclusive 360 degree TIG-welded baffle that splits the radiator core into two sections. This 360 degree baffle in a sense creates two radiators out of one and assures that you won't have any coolant that has entered the radiator but never made it across the core. This is superior to utilizing silicone to seal internal baffles, or worse, a partial weld that allows the coolant to bypass the radiator core completely.

LIGHTWEIGHT 1 ROW X 1.5" TUBE CORE DOUBLE PASS RADIATORS

AFCO Racing Products is proud to announce our new lightweight double pass radiator for late models. This is the easiest and most cost-effective way to shave as much as 10 pounds off the front of your car, allowing you to concentrate ballast and improve handling. The radiator features a new 1.5" thick core for improved air-flow. The new lightweight double pass radiator has the standard features you have come to trust from AFCO, such as furnace brazed tubes with no epoxy. These race-proven lightweight radiators fit the same footprint as our standard radiators and installation is simple with no major modifications needed for mounting.

- **Shaves 10 lbs. from the front of your car.**
- **Features an increased number of tubes and fins in the same height package.**
- **100% pressure tested & 100% TIG-welded with no epoxy.**
- **Optimum fin per inch ratio promotes maximum cooling.**
- **Standard water pressure bung for easy plumbing.**
- **Wide range of inlets 1.5", -16AN, -20AN, and -20 AN Female.**
- **Available in 19" X 27-1/2" with 1-3/4" outlets.**

CUSTOM OVAL TRACK RADIATORS

AFCO Racing Products offers custom built radiators. Call 800-632-2320 for more details or to order your custom radiator!

- Built with formed tanks.
- Any inlet/outlet size and configuration.
- Common core sizes for any application.

DESCRIPTION	PART #	PRICE
SINGLE PASS RADIATOR	80007-NA	\$369.99
DOUBLE PASS RADIATOR	80008-NA	\$419.99

28" EXTRA CAPACITY PRO RADIATORS

The AFCO 28" radiator is built with a 24-3/8" core for optimal cooling in a confined space. This radiator provides an **additional 36 square inches of core area** while increasing overall width by just half an inch.

- *Crate series.* 
- **Great for 604 Engines.**
- *Cars with limited air flow.*
- *Available in Chevy or Ford configurations.*
- *Standard or double pass.*
- *Maximized efficiency.*

ASPHALT OIL COOLER NO FANS	80420	\$329.99

ASPHALT OIL COOLER WITH SINGLE FAN

- 25.63" wide x 10.00" tall x 2.00" deep, single row 1.56" oil core.
- Double pass oil cooler.
- 12AN male inlet and outlet.
- Laser cut tanks and brackets.
- 100% TIG-welded with no epoxy.
- 100% pressure tested.
- Mounts to 80195NDP-16 and 80196NDP-16 radiators.
- Single 10" fan.

AFCO FRAME KIT

AFCO RACING PRODUCTS

1968-1972 CHEVELLE

GM REPLACEMENT FRAME KIT

* ASSEMBLY REQUIRED.
PICTURE SHOWS
ASSEMBLED PRODUCT.

APPROVED BY ALL MAJOR SANCTIONING BODIES!

- Saves up to 6 hours of build time.
- Locating tabs for easy assembly.
- Excellent drag link and radiator clearance.
- Replacement parts available!
- Factory steering bolts directly on.
- Pre-cut spring pockets.

MATERIAL The AFCO Chevelle frame kit is legal in all major Modified sanctioning bodies! The frame kit is a readily available, consistent product that is the same weight and strength of OEM frames and is made with the same cuts. The parts weld together beautifully with no grinding or other time-wasting prep work needed. The final product will drop right into a stock frame jig.

CROSS MEMBER Designed with Modifieds in mind! The cross member has been shaved to provide excellent radiator and drag link clearance. To save even more time in your build, we engineered better steering shaft clearance into the left upper side of the cross member. Cross member and frame horns have 5/16" locating holes to position the cross member precisely in place. Cross member halves also include tabs to "lock together" in the proper position for welding---no worries about squeezing these pieces too far!

FRAME HORNS Front horns are notched in the spring pocket area to ease spring changes. Frame horns and the lower control arm rear mounts have two 5/16" locating holes to easily position for proper placement. Frame horn tabs locate the halves in the proper position for welding, no worries about squeezing them out of place!

ASSEMBLY Consistent positive feedback! Professional chassis builders tell us that using the AFCO Chevelle Frame Kit saves around 6 hours of labor to assemble versus OEM and other frame kits. This kit results in a better-looking and much more dependable product when finished.

CRASH REPAIR No cutting up donor frames! We have replacement individual frame horns and frame rails available for crash repair. These replacement parts will work with AFCO frames, GM 68'-72' Chevelle OEM frames, and others.

APPROVED BY **ALL MAJOR** SANCTIONING BODIES

94 SERIES

- **Addressing Market Demand:** We recognized a significant demand within the Stock Car, Sport Mod, and B-Mod shock tuner market. Identifying a clear need for a specialized base valve non-bulb shock that caters specifically to their unique requirements.
- **Shock Tuner Friendly Design:** Our commitment to meeting the needs of shock tuners led us to develop a manufacturing process that incorporates a removable base valve. This innovation ensures greater ease of tuning and customization.
- **Improved Feel with Internal Base Valve Design:** Our shock absorber features an internal base valve design that allows the shock to run at a lower gas pressure, resulting in an unparalleled improvement in overall feel, responsiveness, and better grip in slick track conditions.
- **Legal Across All Sanctioning Bodies:** Worried about compliance? Rest assured, our shock absorber is fully approved and legal for use in all sanctioning bodies, giving racers the peace of mind they need.
- **Customizable Valving Options:** We understand that each racer has specific requirements for their vehicle. That is why our shock absorbers are available with both standard and custom valving options, providing racers with the flexibility to tailor the performance to their preferences.
- **Piston Options for Optimal Performance:** We offer a choice between linear or digressive pistons, allowing racers to fine-tune their setup for maximum performance and control.
- **Unmatched 9" Stroke Shock for Left Rears:** Outpacing the competition, we proudly present a full 9" stroke shock designed specifically for left rear applications. This unique feature sets our shock absorber apart from all others on the market.
- **Enhanced Driver Feel with 1/2" Diameter Shaft:** To enhance driver feel and ensure an exceptional driving experience, we've incorporated a 1/2" diameter shaft, delivering a level of precision and feedback unmatched by other shock absorbers.

GAS SHOCKS **STEEL BULB**

DIRT MODIFIED

85/86/87/88 SERIES

The 85-88 Series AFCO shocks were specifically developed to bring optimum performance, quality, and tunability to the Modified racing market. The shocks incorporate flow-matched billet aluminum pistons and base valves that were developed in-house using 5-axis CNC machining technology and EMA dyno capability. Each piston and base valve was developed together to minimize hysteresis and utilize premium quality hardware and shims for balanced response. The steel gas reservoir, or "bulb", has been weight and size optimized for better fit without increasing pressure gain. The 86 and 88 Series IMCA legal shocks utilize the new IMCA "universal" fill port that can be easily changed to a Schrader valve application when sanctioning rules allow. The shocks are 100% owner serviceable or can be serviced by any AFCO shock tuning center for convenient and fast turnaround.

ADDITIONAL FEATURES

- Smaller 2.5" bulb for better clearance and lighter weight!
- Anodized billet aluminum pistons and base valves.
- 1/2" (12.7mm) Ultra strong DUROx chrome shaft design.
- Optimized gas reservoir is nearly a half-pound lighter than AFCO 75-78 Series shocks.
- Available with Schrader valve or the new IMCA Universal Fill Port.
- Robust sealing system withstands high temperatures and heavy debris.
- Nickel-plated shock exterior provides un-matched durability and long-term cosmetic appearance.
- Available with or without a base valve.

NEW

81 SERIES

STOCK MOUNT

STREET STOCK, HOBBY STOCK
& SOUTHERN SPORT MOD

- AFCO'S **NEW** 81 Series Stock Mount Shocks are designed specifically for Southern Sport Mod, Hobby Stock, and Street Stock cars.
- The new large body front shocks feature a newly designed 44mm piston, which reduces fade and minimizes heat buildup. Multiple piston options are available, allowing for fine-tuned valving and maximum performance.
- The shorter front shocks enable you to lower the front end of your car, improving stability and control. Additionally, the maximum 21" extended-length rear shocks enhance handling and provide better forward bite, giving you the competitive advantage needed to cross the finish line first.
- Engineered for GM A/G Body Style cars, the 81 Series shocks offer a convenient stock mount option. The optimized lengths ensure compliance with regulations set by IMCA and other sanctioning bodies. Contact a sales representative to learn more about how the 81 Series shocks can significantly improve your car's performance.

TWIN TUBE SHOCKS **STEEL**

NON-ADJUSTABLE

SEALED SHOCK SERIES

\$121⁹⁹ EACH

AFCO and DirtCar are proud to introduce the Pro Modified Spec Shock. The Spec Shock is AFCO's 14 Series non-adjustable twin tube shock that has been in production for 10+ years. This is the most budget-friendly shock in AFCO's lineup. Each shock will be equipped with a DirtCar decal to make it easy to tech. This shock is strong and dependable with a 9/16" shaft and twin tube design that allows small dents in the body without damaging the shock. Low up-front cost plus making the shock sealed eliminates the high customization fees which make it ideal for this economic class.

ADDITIONAL FEATURES

- Economical sealed body.
- Best twin tube value on the market.
- 9/16" Shaft.
- Grooved for use in coil-over applications.

3-5 VALVE (SLICK)	13"	21"	REAR	1035

ALL '70-'81 CAMARO AND FIREBIRD

	COMPRESSION	EXTENSION	MOUNT	PART#
5 VALVE (MEDIUM)	14-1/2"	22-1/2"	REAR	1032
3-5 VALVE (SLICK)	14-1/2"	22-1/2"	REAR	1034

AVAILABLE SPLIT-VALVES

- **1022** is a "split valve - easy up" shock used on the front to promote weight transfer under acceleration. This will enhance forward traction.
- **1034** and **1035** are split-valve shocks for rear applications. Soft compression helps weight transfer. In oval track applications used on the left rear, these shocks tend to tighten corner exit handling. When used on the right rear, these shocks tend to tighten corner entry handling.

PISTONS REPLACEMENT PARTS

NEW 46MM LINEAR/DIGRESSIVE VELOCITY DEPENDENT PISTON

551001298 - \$74.99

Features include an internal shim stack design for better control, radius dished surface for better sealing and better zero points, and internal fluid passages to eliminate shim sticking, guaranteeing consistent and reliable performance every time.

NEW 46MM DIGRESSIVE/DIGRESSIVE VELOCITY DEPENDENT PISTON

551001299 - \$74.99

Features include an internal shim stack design for better control, radius dished surface for better sealing and better zero points, and internal fluid passages to eliminate shim sticking, guaranteeing consistent and reliable performance every time.

46MM LINEAR STANDARD PISTON

550000682 - \$85.99

AFCO Racing's 46mm Billet 3 Port Linear/6 Port Linear Piston, machined with precision on advanced 5-axis CNC equipment, offers peak performance and consistency. Rigorously tested in-house, it guarantees quality and reliability for demanding conditions.

3 PORT LINEAR PISTON

550001139 - \$85.99

AFCO's 46mm Billet 3 Port Linear/3 Port Linear Piston excels in delivering optimal performance by strategically reducing flow to achieve desired damping curves. Each piston is subjected to rigorous deburring and a comprehensive 100% inspection process, ensuring consistent and reliable performance.

46MM LINEAR/DIGRESSIVE PISTON

550000934 - \$85.99

AFCO's 46mm Billet 6 Port Linear/Digressive Piston is machined with precision CNC equipment to guarantee top-tier performance. With anodized billet aluminum construction, 100% inspection, and precision deburring, this piston delivers consistent damping curves, featuring high flow rebound for flatter digressive performance.

3 PORT LINEAR/DIGRESSIVE PISTON

550001140 - \$85.99

AFCO's 46mm Billet 3 Port Linear/Digressive Piston, meticulously crafted with the latest 5-axis CNC equipment, guarantees peak performance. Featuring anodized billet aluminum construction, precision deburring, and 100% inspection, this piston strategically reduces linear flow to achieve precise and consistent damping curves.

LINEAR/DIGRESSIVE

LINEAR/DIGRESSIVE
VELOCITY DEPENDENT

LINEAR/LINEAR

LINEAR-STYLE BASE VALVE

- 46mm piston size is compatible with AFCO 46mm bore monotube shocks.
- Anodized billet aluminum construction.
- Developed, optimized, and tested using an in-house EMA dyno.
- Machined in-house with state-of-the-art 5-axis CNC machinery.
- Developed and manufactured to be repeatable and consistent.
- 100% inspected and precision deburred.
- Linear/Linear or Linear/Digressive piston options.
- Performance matched base valve (85-88 Series).

AFCO SUSPENSION

ULTRA LIGHTWEIGHT BLACK COATED SPRINGS

You asked for it and AFCO delivered! Responding to market demand, now you can run high-quality AFCO springs and still get that "blacked out" look!

- **AFCOIL® Springs featuring a black coating.**
- **Get the performance you are looking for with the tightest tolerances in the industry.**
- **All AFCOILS® are manufactured using ultra-high tensile wire.**
- **AFCO Conventional Springs are guaranteed not to lose more than 2% of free height.**
- **Engineered design resists spring lean and bow.**
- **Best warranty in the industry!**

AFCOIL LIFETIME WARRANTY

SPRING RUBBER

Spring rate can change depending on the thickness of the rubber, the location of the rubber, and the type of spring being used. Use with coil springs to increase effective spring rates. Make fast & easy spring rate changes!

- Comes in 7/8" and 3/4" thickness.
- Will fit any brand of 2-1/2" or 2-5/8" coil-over springs, including barrel springs and conventional springs.

DESCRIPTION	PART #	PRICE
COIL-OVER SPRING RUBBER 3/4"	20185	\$58.99
COIL-OVER SPRING RUBBER 1"	20185-1	\$58.99
SPRING RUBBER FOR 5" OR 5-1/2" CONVENTIONAL COIL	20186	\$23.99

COIL SPRING BUCKET

Installs in frame so racing springs and weight jacks can be used.

- Uses standard weight jacks.
- Works with any 1-1/8" SAE jack bolt.

DESCRIPTION	PART #	PRICE
BUCKET - 1" COURSE	20190C	\$54.99

COIL SPRING SPACER

Just trim to set wedge and ride height in car.

- For 5" or 5-1/2" springs.
- Welds into spring pocket.
- I.D. open for stock mount racing shock installation.

DESCRIPTION	PART #	PRICE
COIL SPRING SPACER	20192	\$43.99

ADJUSTABLE COIL SPRING SPACER

Allows 2" range of height adjustment when fitting 5" or 5-1/2" springs into stock stub cars.

- Use collar to adjust ride height and wedge.
- ACME threads for high strength.
- Trim sleeve for initial fit then weld.

DESCRIPTION	PART #	PRICE
ADJUSTABLE SPACER SHORT	20187	\$54.99
ADJUSTABLE SPACER TALL	20191	\$59.99

11" BOLT	20194-11D	\$23.99

SPRING ACCESSORIES

DETENTED LIGHTWEIGHT WEIGHT JACK SYSTEM

AFCO's new Detented Weight Jack System eliminates the need for a jam nut, which allows for fast wedge adjustments on a pit stop or during chassis set up. The stainless-steel ball and spring lock the plate from turning under race conditions to prevent unwanted chassis changes on the track. Ideal for cars that have little or no room around the weight jack bolt. The special ball-ended jack bolt and its accommodating cupped spring plate seat helps to eliminate spring-to-jack bolt misalignment and spring binding during normal suspension travel.

- **Faster adjustments!**
- Black powder coated finish.
- Integral pivot for improved spring alignment during suspension travel.

DESCRIPTION	WEIGHT	PART #	PRICE
LIGHT WEIGHT SPRING CUP	1.2 LBS.	20195LW	\$48.99
LIGHT WEIGHT JACK BOLT 8" LENGTH	1.5 LBS.	20194-8D	\$23.99

3-PIECE METRIC & "PINTO STYLE" SPINDLE

The 3-piece 1979-Up GM metric spindle is a re-creation of an OEM spec spindle in a newly forged, heat-treated steel design that is both stronger and lighter than the original. The unique three-piece construction provides for fast, convenient, and affordable replacement of individual components in the event of a crash. These spindles are IMCA, USMTS, and USRA approved. Works great with our 1979-Up GM metric front brake rotors, bearings, calipers, etc.

The "Short Arm Pinto Style" spindle is an adaptation of the above 3-piece metric spindle. It fits the '79-Up metric hub, calipers, and the extended 20038-1 (K6117) lower ball joint. Upper ball joint boss is reamed to 7° to accept the popular 20034 (K772) screw-in ball joint. Steering arm is Pinto length and lowered to help correct bump steer.

- Forged, heat-treated steel.
- Three-piece design for quick, easy replacement.
- Metric is a direct replacement for factory spindle.
- Replacement parts sold separately.

AFCO LOW FRICTION BALL JOINTS

- Improves weight transfer.
- Frees up suspension for more consistent, repeatable chassis tuning.
- Precision-machined to tight tolerances, providing consistent resistance throughout the travel of the ball joint, to deliver consistent performance.
- Road inputs are controlled more effectively by the shock and spring instead of the tire, which improves traction.

- Removes suspension bind and allows shock & spring to have more precise wheel control.
- Meets or exceeds standard ball joint strength.
- Provides more accurate setups during vehicle scaling.
- Lower input steering efforts and faster steering wheel return.
- Extended lengths will raise roll center and improve camber curves.

21036

21536

21136

TAKE-A-PART LOW FRICTION BALL JOINTS

- Take-a-part design.
- Low friction design.
- Multiple pin lengths and tapers available.
- No special tools required to assemble or disassemble.
- IMCA legal.
- Simple 3-piece design.

SEALED LOW FRICTION BALL JOINTS

AFCO's low friction ball joints are designed with 2 ft. lbs. of resistance, the force required to move the stud of the ball joint. Compare this with standard replacement joints, with as high as 50 ft. lbs. of resistance.

- **Only 2 ft. lbs. of resistance and less bind = lower lap times.**
- Stock appearing.

STANDARD BALL JOINTS

Not all ball joints are created equal. That's why we choose the best components from the top U.S. manufacturers. There are many different design characteristics and manufacturing processes that account for the quality and performance of ball joints. We choose the best to give you the AFco Advantage.

CONTROL ARM BUSHINGS

LIGHTWEIGHT LOWER ARM BUSHINGS

AFCO's precision-machined steel replacement bushings offer dramatic reductions in friction when compared to rubber or urethane-style bushings. By nearly eliminating drag on suspension movement, your shock and springs will work more effectively to keep your tires stuck to the track.

• **Near zero-drag bushings!**

- Inner sleeve allows bolt to be tightened without crushing or binding.
- Dimensions allow direct replacement of the standard bushing.
- Dramatically frees up front suspension.

LIGHTWEIGHT LOWER ARM BUSHING DIMENSIONS

PART #	DIAMETER	LENGTH	LBS.
20069LW	1.40"	2.94"	0.625
20075LW	1.40"	2.39"	0.625
20076LW	1.65"	2.39"	0.625
20077LW	1.90"	2.39"	0.750

SERVICE PARTS: FOR NYLON SLEEVE, ADD -B TO PART NUMBER, (20075LW-B). FOR INNER SLEEVE, ADD -C TO PART NUMBER, (20075LW-C).

STANDARD STEEL ARM BUSHINGS

• **Near zero-drag bushings!**

- Dimensions allow direct replacement of the standard bushing.
- Dramatically frees up front suspension.

STANDARD LOWER ARM BUSHING DIMENSIONS

PART #	DIAMETER	LENGTH	LBS.
20069	1.40"	2.94"	1.250
20075	1.40"	2.39"	1.250
20076	1.65"	2.39"	1.250
20077	1.90"	2.39"	1.750

STANDARD UPPER ARM BUSHING DIMENSIONS

PART #	DIAMETER	LENGTH
20079	1.53"	1.84"
20099	1.31"	1.79"

NOTE: DUE TO PRODUCTION TOLERANCE VARIANCE IN ORIGINAL EQUIPMENT PARTS, STEEL BUSHINGS NEED TO BE TACK-WELDED INTO THE CONTROL ARM.

REAR CONTROL ARM BUSHING WITH SPHERICAL BUSHING

These steel rear control arm bushings have spherical bearings in them just like a rod end, which frees up suspension movements and eliminates binding. Fits '73-'88 GM mid-size rear control arms. Sold individually.

DESCRIPTION	PART #	PRICE
REAR CONTROL ARM BUSHINGS (1 PCS)	20095	\$48.99

OFFSET REAR CONTROL ARM BUSHINGS

These polyurethane bushings have the center hole offset 1/4" to allow you to compensate for wheel or pinion angle issues. Fits '65-'88 GM mid-size rear control arms. Sold per pair.

DESCRIPTION	PART #	PRICE
OFFSET REAR CONTROL ARM BUSHINGS (2 PCS)	20090	\$59.99

BALL JOINT SLEEVES

- 1.0" Small threaded ball joint sleeve for 20034 & 20035.
- 1.830" I.D. and 2.250" O.D.
- 0.35 lb.

DESCRIPTION	I.D.	O.D.	HEIGHT	WEIGHT	PART #	PRICE
SMALL THREADED FOR 20034, 20035	1.830"	2.250"	1.00"	.35 LB.	20043	\$32.99

TAPER REAMERS

- Manufactured from superior-quality high-speed tool steel.
- Six flute spiral design allows smooth boring operation & minimizes tool wear.
- Two designs to cover most popular racing applications.

DESCRIPTION	APPLICATION	PART #	PRICE
1-1/2", 7° TAPER (PER FT.)	20031, 33, 34, 35, 36 BALL JOINTS	80770	\$186.99
2", 10° TAPER (PER FT.)	20032, 32-1, 32-2, 38, 38-1, 39 BALL JOINTS	80771	\$186.99

LEAF SPRINGS

REINFORCED FRONT SEGMENT LEAF SPRINGS

The new AFCO reinforced front segment springs have proven to provide considerable increases to forward bite when used on race cars equipped with conventional type leaf springs.

New secondary leaf design means:

- Quicker throttle response.
- Improved forward bite.
- Improved durability of leaf spring.
- Reduces wheelbase variations during braking and acceleration to improve overall handling consistency.
- 10 - 15% stiffer front segment.

DESCRIPTION	CAR WT.	ACT. ARCH	NOM. RATE	PART #	PRICE
CAMARO TYPE	25-3000#	6-3/8"	176	20228RF	\$274.99
CAMARO TYPE	30-3400#	6-3/8"	205	20228HDRF	\$274.99
CHRYSLER TYPE	28-3200#	6-5/8"	166	20231HDRF	\$274.99

LEAF SPRING DIMENSIONS CHART

DESCRIPTION	WIDTH	FRONT SEGMENT	EYE TO EYE LENGTH	EYE ID FRONT	EYE ID REAR
CAMARO TYPE	2-1/2"	24-3/4"	54"	2"	1-5/8"
CHRYSLER TYPE	2-1/2"	20-1/2"	52-7/8"	1-1/2"	1"

To accurately check for arch measurement, lay spring on side and pull a straight line from center of front eye to center of rear eye. Measure from line to top leaf at the locating pin.

AFCO MULTILEAF SPRINGS

Racers using multileaf springs realize the importance of accurate arch, load capacity, and durability. AFCO Leaf Springs are the highest quality racing springs available and give you features not available in any other leaf spring.

- Lightweight IMCA Modifieds to heavy stock cars — AFCO has the correct springs.
- Our chrome-vanadium alloy spring steel material is superior to others and provides consistent rates over a longer life span.
- Teflon rub blocks between leafs reduces friction and maintains consistency of rate.
- Tapered leafs reduce stress by 30-40% and prevent loss of arch.
- Shot-peened after arching to reduce tensile stress provides 3 - 5 times more service life to the spring.
- Chrysler or Camaro style.
- Front bushing included.

DESCRIPTION	CAR WT.	ACT. ARCH	NOM. RATE	PART #	PRICE

COLLAPSIBLE STEERING COLUMN

- 22-1/2" to 32" column measured from the end of the shaft to the base of the quick release hub.
- Quick release hub adds an additional 2" to the overall length.
- O.D. of the main body is 1.125" & O.D. of the bottom shaft is .750" and 20 spline.
- Splined end accepts a variety of U-joint for attachment to your steering shaft or gear.

LENGTH	DESCRIPTION	PART #	PRICE
22.5"-32"	SLIDING STEERING COLUMN	37304	\$329.99

ADJUSTABLE THROTTLE PEDAL

Now AFCO control begins with the throttle. We've re-engineered one of the most fundamental components of the race car to provide greater precision, improved comfort, and more driver control than ever. Fully sealed bearings, double splined shaft and adjustable angle on the throttle lever means secure adjustability in a maintenance-free package.

- **Greater precision, improved comfort & more driver control.**
- Provides better feel for smoother operation.
- Mounting instructions and tuning guide included.
- Double splined shaft.
- Fully sealed bearings.
- Durable anodized finish.

DESCRIPTION	PART #	PRICE
ADJUSTABLE THROTTLE PEDAL	40292	\$129.99

AFCO BRAKES

CALIPERS

F44 ALUMINUM METRIC CALIPER

- The **LIGHTEST** Metric Caliper on the market!
- 20% stiffer than cast! Forged construction with extra-large crossbolts gives less flex, better pedal feel, less brake fade, and less pad taper than the competition.
- Comes with 2 one-piece bleeders - fits left or right side of chassis.
- Does not require a pad spacer.
- 2-1/2" bore piston.
- 1/8" NPT inlet fluid port.
- Stainless guide plates.
- NEW low drag seals.

**Reduces Unsprung Weight
By 15 lbs. Over Stock!**

USMTS, UMP Approved

5.5" MOUNTING LUGS

DESCRIPTION	PART #	PRICE
2-1/2" BORE - ALUMINUM METRIC CALIPER	6630510	\$159.99
REBUILD KIT, 2" METRIC ALUMINUM	6690310	\$20.99
2-1/2" F44 SEAL	6690334	\$11.99
2" SEAL	55000018905	\$5.99

STEEL PAD SPACERS FOR AFCO 6630310

DESCRIPTION	PART #	PRICE
2" BORE - STEEL PAD SPACER (EA) (FITS AFCO ALUMINUM METRIC CALIPER ONLY.)	6691310	\$9.99

NEW & IMPROVED

STOCK 2-1/2" GM METRIC CALIPERS

IMCA/WISSOTA, USMTS/UMP, USRA, NCRA Approved

- Legal replacement for stock classes.
- Quality control checked and pressure-tested.
- **NEW** virgin casting and pistons.
- 5.5" Bolt Spacing.

DESCRIPTION	PART #	PRICE
STOCK GM METRIC CALIPER-RIGHT SIDE	6635003	\$89.99
STOCK GM METRIC CALIPER-LEFT SIDE	6635004	\$89.99

GM METRIC CALIPERS

OVERSIZED 2-3/4" GM METRIC CALIPERS

UMP Approved

- Increases range of brake bias adjustment for better brake performance.
- Allows for more brake system tunability.
- Stock appearing.
- Quality control checked and pressure-tested.

DESCRIPTION	PART #	PRICE
OVERSIZE GM METRIC CALIPER-RIGHT SIDE	7241-9001	\$99.99
OVERSIZE GM METRIC CALIPER-LEFT SIDE	7241-9002	\$99.99

5.5" MOUNTING LUGS

UNDERSIZED 2-1/4" GM METRIC CALIPERS

UMP, AMRA, NCRA Approved

- Use on right front to loosen car on corner entry.
- Allows for more brake system tuning.
- Stock appearing.
- Quality control checked and pressure-tested.

DESCRIPTION	PART #	PRICE
UNDERSIZED GM METRIC CALIPER-RIGHT SIDE	7241-9005	\$99.99

STEEL METRIC CALIPER FITTINGS AND HARDWARE

AFCO BRAKES

MASTER CYLINDERS

INTEGRAL RESERVOIR MASTER CYLINDER

The AFCO engineering team started with a clean sheet when designing our master cylinders. AFCO's master cylinders offer the same great performance that customers have come to expect from AFCO. With a one-piece design that incorporates a high-capacity reservoir and precisely machined/polished cylinder bore, the piece makes efficient use of space and materials.

- External return spring maintains positive pedal feel and helps prolong pad life by ensuring quick reaction to released pedal force.
- Precise-fitting lid held firmly in place by heavy gauge retainer.
- Slim design rubber boot allows easy installation into most pedal assemblies.
- Aluminum bore with hard anodized pistons.
- Unique, built-in minimum and maximum fill tabs are easy to read and make quick work of checking fluid even in dark pit areas.
- Common dual-mounting bolt patterns for most racing applications.
- Models come in 3/4", 7/8", and 1" bores.
- Designed for standard 1/8" NPT fittings for easy replacement.

DESCRIPTION	PART #	PRICE
3/4" BORE INTEGRAL MASTER CYLINDER	6620010	\$59.99
7/8" BORE INTEGRAL MASTER CYLINDER	6620011	\$59.99

CLUTCH MASTER CYLINDER 3/4"	2011-1912	\$73.99

AFCO BRAKES

ROTORS

HYBRID

IMCA, USMTS, UMP, WISSOTA Approved

This rotor combines the strength of a '75-'81 Ford-style hub (Granada) with the lighter design of the metric brake rotor for an unbeatable lightweight and durable package. AFCO engineers designed this rotor with the latest CAD software and testing methods. Manufactured to withstand rigorous racing environments, the AFCO Hybrid Rotor uses castings designed and built specifically for racing. It will remove up to 13 lbs. of unsprung weight on the front of your car to improve front to rear weight bias and wheel control.

- Safely remove up to 13 lbs. from the front of your car vs. stock rotor.
- Uses GM metric caliper.
- Ford '74-'80 Pinto spindle.
- 14.8 lbs. total rotor weight with 5/8" studs.
- Drilled for 4-3/4" bolt pattern.
- 10.13" diameter.
- .813" thickness (pad spacer recommended).
- Uses 9851-8551 Master Install Kit.
- Races pre-installed.
- **LIGHTWEIGHT DESIGN FOR DIRT USE ONLY.**

DESCRIPTION	PART #	PRICE
5/8" COARSE STUDS ON 5" X 5" PATTERN	9850-6505	\$78.99
5/8" COARSE STUDS ON 5" X 5" PATTERN - LONG STUD	6640137	\$89.99
MASTER INSTALL KIT*	9851-8551	\$41.99
BEARING KIT (INNER AND OUTER BEARINGS)	9851-8510	\$25.99
SEAL	9851-8521	\$11.99
DUST CAP	9851-8501	\$15.99

* MASTER INSTALL KIT INCLUDES: BEARINGS, SEAL, WASHER, NUT, PIN & DUST CAP.

Designed for use with '74-'80 Pinto / Mustang II spindle and AFCO brackets 40122PL & 40122PR (Page 82).

FORD STYLE '75 - '81

IMCA, USMTS, UMP, WISSOTA Approved

- Reduces rotating weight.
- Fits Pinto pin.
- 5/8" coarse studs installed on 5" x 5" pattern.
- Pre-drilled with 4-1/2" stock pattern.
- 11" diameter x .875" thickness.
- Races pre-installed.
- Stock-appearing.
- Uses stock 9851-8552 Master Install Kit.
- Meets OEM sanctioning requirements for modifieds, street stocks, and hobby stocks.
- **LIGHTWEIGHT DESIGN FOR DIRT USE ONLY.**

DESCRIPTION	PART #	PRICE
5/8" COARSE STUDS ON 5" X 5" PATTERN	9850-6510	\$78.99

DESCRIPTION	PART #	PRICE
MASTER INSTALL KIT*	9851-8552	\$52.99

ROTORS

PILLAR VANE

- Designed using premium grade alloys for superb thermal shock stability.
- Machined and double disc ground to assure precise flatness.
- Precise pillar placement for high volume cooling.
- Premium center - split castings reduce stress risers.
- Rotationally machined balanced - CNC.

AFCO continues the commitment to bring new and innovative components to the racing community. Pillar vane rotors are engineered to provide superior strength, reduce rotor weight and run cooler. At the heart of the rotor, each pillar is diamond shaped, providing brake pad surface stability as well as reducing rotating weight over rotors of similar strength. Racers will take note of reduced weight and cooler operating temperatures when compared to rotors of similar strength. Reduced rotating weight means reduced lap times.

FLAT PILLAR VANE

- More brake pad surface support (pillars) to prevent rotor cupping.
- Strength of an 80 vane rotor with the weight savings of a 32 vane rotor.
- Machine balanced to reduce vibration and improve brake system performance.
- Increased cooling capacity.
- Proven by top racers to improve the brake system.

THICK	BOLT CIRCLE	DIA	WEIGHT	PART #	PRICE
.810"	7"	11.75"	8.1 LBS.	6640100	\$69.99

SLOTTED PILLAR VANE

- More brake pad surface support (pillars) to prevent rotor cupping.
- Strength of an 80 vane rotor with the weight savings of a 32 vane rotor.
- Machine balanced to reduce vibration and improve brake system performance.
- Increased cooling capacity allows for trail braking, lap after lap.
- Gas slots to wipe brake pad and eliminate brake system fade.

USMTS, UMP, WISSOTA Approved

LH .810"	7"	11.75"	8.1 LBS.	6640105	\$99.99

LIGHTWEIGHT 32 VANE

AFCO's disc brake rotors set the pace for design, quality, and performance. Special designed materials, enhanced computer imagery and design, as well as extensive lab and track testing have yielded a superior brake rotor. All AFCO rotors have been optimized for strength, weight, and heat dissipation ability to meet the demands of the serious racer.

- Designed and manufactured using premium grade alloy for superior thermal stability.
- Precision machine ground and balanced for flatness and reduced vibrations.
- Precision designed and positioned vanes for maximum cooling.
- Tried and trusted for over 20 years.

AFCO BRAKES

PEDALS

6.25:1 REVERSE DUAL SWING PEDALS

- Extra-long bias adjuster to allow even more adjustment.
- H-beam forged aluminum pedal design.
- Ultra high strength bias bar; same strength of 7/16" bias bar in the traditional 3/8" size.
- New snap ring gives more bias rod clearance and eliminates thread interference.
- Ultra-strong upper mount has 52% less flex than the competition.
- Rounded clevis design prevents bias-bar lock-up at extreme limits of travel.
- Integral bias bearing stops prevent lock-up when adjusting bias.
- Internal hex in bias bar eases bias set up.
- 6.25:1 Pedal ratio.
- 4.36 lbs.
- AFCO master cylinders sold separately (see page 85).

Exclusive bias "tie-bar" adds strength and sets clevis spacing for proper master cylinder function.

DESCRIPTION	PART #	PRICE
REVERSE DUAL SWING BRAKE PEDALS	6610000	\$349.99

6.25:1 FORWARD DUAL SWING PEDALS

- Extra-long bias adjuster to allow even more adjustment.
- H-beam forged aluminum pedal design.
- Ultra high strength bias bar; same strength of 7/16" bias bar in the traditional 3/8" size.
- New snap ring gives more bias rod clearance and eliminates thread interference.
- Ultra-strong upper mount has 52% less flex than the competition.
- Rounded clevis design prevents bias-bar lock-up at extreme limits of travel.
- Integral bias bearing stops prevent lock-up when adjusting bias.
- Internal hex in bias bar eases bias set up.
- 6.25:1 Pedal ratio.
- 4.36 lbs.
- AFCO master cylinders sold separately (see page 85).

Exclusive bias "tie-bar" adds strength and sets clevis spacing for proper master cylinder function.

DESCRIPTION	PART #	PRICE
FORWARD DUAL SWING PEDALS	6610001	\$349.99

7:1 FORWARD SINGLE SWING PEDALS

- H-beam forged aluminum pedal design.
- Pedal assemblies fit many popular chassis.
- Allows for positioning of the clutch pedal to be away from the driver for better comfort.
- New snap ring gives the brake pedal more bias rod clearance and eliminates thread interference.
- Ultra high strength bias bar on brake pedal; same strength of 7/16" bias bar in the traditional 3/8" size.
- Rounded clevis design prevents bias-bar lock-up at extreme limits of travel.
- Integral bias bearing stops prevent lock-up when adjusting bias.
- Internal hex in bias bar eases bias set up.
- 7:1 Pedal ratio allows for better braking power.
- Brake pedal weight: 2.36 lbs.
- Clutch pedal weight: 1.64 lbs.
- AFCO master cylinders sold separately (see page 85).

DESCRIPTION	PART #	PRICE
7:1 FORWARD SINGLE SWING BRAKE PEDAL	6610003	\$211.99
7:1 FORWARD SINGLE SWING CLUTCH PEDAL	6610004	\$169.99

6:1 FORWARD SINGLE FLOOR PEDALS

- H-beam forged aluminum pedal design.
- Pedal assemblies fit many popular chassis.
- Allows for positioning of the clutch pedal to be away from the driver for better comfort.
- New snap ring gives the brake pedal more bias rod clearance and eliminates thread interference.
- Ultra high strength bias bar on brake pedal; same strength of 7/16" bias bar in the traditional 3/8" size.
- Rounded clevis design prevents bias-bar lock-up at extreme limits of travel.
- Integral bias bearing stops prevent lock-up when adjusting bias.
- Internal hex in bias bar eases bias set up.
- 6:1 Pedal ratio.
- Brake pedal weight: 2.20 lbs.
- Clutch pedal weight: 1.46 lbs.
- AFCO master cylinders sold separately (see page 85).

DESCRIPTION	PART #	PRICE
6:1 FORWARD SINGLE FLOOR BRAKE PEDAL	6610005	\$211.99
6:1 FORWARD SINGLE FLOOR CLUTCH PEDAL	6610006	\$169.99

REPLACEMENT BIAS BAR KITS

DESCRIPTION	PART #	PRICE
BIAS BAR KIT FOR REVERSE MOUNT PEDAL	6610010	\$84.99
BIAS BAR KIT FOR FORWARD MOUNT PEDAL	6610011	\$84.99

AFCO BRAKES

BRAKE PADS

AFCO proudly offers its line of racing and high performance brake pads. These brake pads have gone through extensive development and testing in the toughest racing environments. Our racing brake pads are derived from the latest materials in friction products and utilize the latest technologies in brake pad manufacturing.

- Improved stopping power.
- High torque with excellent control qualities.
- Exceptional high temperature performance.
- User friendly/easy break-in.
- Exceptional pad and rotor wear.
- Available in five compounds (32, C1, 33, C2 and 34) to fit popular caliper styles.

5 COMPOUNDS TO CHOOSE FROM!

Compound 32 - This compound was designed and developed for the right front of dirt cars where low grip is needed. Each high quality 32 pad is made one pad at a time to improve consistency from pad to pad. With lower grip, the 32 is an excellent brake pad for RF dirt cars.

Compound C1 - This compound was designed and developed to meet the braking needs of medium to high temperature racing applications. As brake system temperatures quickly increase and decrease, C1 provides consistent performance while remaining very fade resistant. C1 has proven to be extremely rotor friendly and provides exceptional pad life without requiring lengthy pad break-in (bedding) procedures. C1 is widely used in dirt track racing and is the ultimate pad choice for all medium temperature applications. Recommended temperature use: 400 to 900 degrees.

Compound 33 - This compound was designed and developed for cold stopping power and improved stopping power at wider temperature ranges which reduces brake fade. Along with the 33's improved stopping power, you can expect less rotor wear. Each high quality 33 pad is made one pad at a time to improve consistency from pad to pad. With more heat range and less glazing, the 33 is an excellent brake pad for front and rear dirt cars and rear asphalt cars. Recommended temperature use: 200 to 1200 degrees.

Compound C2 - This compound provides exceptional high temperature performance. C2 is designed to withstand wide-ranging temperature changes, giving the driver predictable pedal feel and excellent control qualities lap after lap. C2 is high in torque value yet has very long pad wear. Compound C2 is the perfect choice for all higher temperature applications. Recommended temperature use: 500 to 1200 degrees.

Compound 34 - This compound was designed and developed for cold stopping power and improved stopping power at wider temperature ranges which reduces brake fade. Along with the 34's improved stopping power, you can expect less rotor wear. Each high quality 34 pad is made one pad at a time to improve consistency from pad to pad. With more heat range, less glazing and less rotor wear, the 34 is an excellent brake pad for rear dirt cars and front asphalt cars. Recommended temperature use: 200 to 1600 degrees.

HIGH PERFORMANCE BRAKE FLUID

HIGH PERFORMANCE HTX BRAKE FLUID

The HTX fluid has been engineered to meet the demanding requirements of super late model (dirt and asphalt) as well as dirt modified and "outlaw" open wheel modified racing. HTX fluid offers superior performance where high brake system temperatures for an extended time period are experienced. AFco High Performance Brake Fluid will exceed your expectations!

- Dry boiling point of 600°+.
- A "must have" for asphalt cars.
- Non-silicone fluid.
- Sealed in steel can for longer shelf life.
- Best value in brake fluid on the market.

DESCRIPTION	PART #	PRICE
HTX SINGLE 16.9 OZ. CAN	6691903	\$25.99
HTX CASE (12 CANS)	6691904	\$275.99

HIGH PERFORMANCE HT BRAKE FLUID

Better performing brake systems start with superior brake fluid. The HT fluid has been designed to provide enhanced performance for applications ranging from street stocks to open wheel modifieds to drag racing and is value priced. AFco HT Brake Fluid will out-perform comparable fluids.

- Dry boiling point 500°+.
- Non-silicone fluid.
- Eliminates brake fade due to fluid failure caused by heat.

DESCRIPTION	PART #	PRICE
HT SINGLE 12 OZ. BOTTLE	6691901	\$9.99
HT CASE (12 CANS)	6691902	\$84.99

AFCO COOLING

ALUMINUM RADIATORS

Every AFCO radiator is built from detailed, computer-designed specifications and use precision CNC laser-cut parts for exact tolerances. We never stamp tanks. Our tanks are either laser-cut and precision-welded or formed using a "drawn" technique that keeps a uniform thickness and eliminates weak spots.

AFCO understands the vital role the radiator plays in protecting the investment you have in your car. That is why we make no excuses or compromises in constructing the best aftermarket radiators in the industry. Don't trust your pride and joy to anything less than AFCO quality!

FROM CORE TO FINISHED PRODUCT...

MADE BY EXPERTS

Quality control and strict production tolerances are key to developing a premium product. Controlling these aspects in-house means AFCO radiators are produced to the highest standards without compromise.

100% ALUMINUM CONSTRUCTION

By using a modern furnace-brazed process, all AFCO radiators feature all-aluminum construction without the need for epoxy. Not only does this make for a lighter radiator, but the common material bonding provides for increased thermal efficiency as well.

ADVANCED MANUFACTURING

Our robotic welding cell for high volume production features a new Fanuc Robot and CMT technology. We also have water jet, laser cut, CNC brake and other capabilities. Our engineering professionals use the most advanced platforms, such as CREO, to design the most innovative products in the industry.

PREMIUM QUALITY

AFCO produces high quality radiators and cores. These cores are epoxy free and defect free. Each part goes through our stringent quality control process. We pressure-test every one of our radiators to ensure that our customers will keep their cool on the track.

SPECIAL APPLICATIONS

In-house design and fabrication allows us to conceptualize, prototype, test, and manufacture custom cooling systems for a wide variety of applications. If you have a specialty radiator need, AFCO can deliver.

STATE-OF-THE-ART ALUMINUM BRAZING

FURNACE SPECIFICATIONS

30" Wide Belt
8" Pass Height
18-22 Cores/Hour

STAINLESS STEEL "HOTBOX" DATA RECORDER

Brazing profiles are created for each core based on the total mass weight. The furnace temperatures and belt speeds are adjusted based on feedback from a data recorder. The hotbox ensures a quality braze profile for each core.

FURNACE CONTROLS

The furnace is controlled via a touch screen HMI panel. Each component uses a unique brazing profile that is developed and saved as a recipe. This recipe includes belt speed, zone temperatures, and nitrogen flow. The system software also provides features such as historical brazing data and maintenance scheduling.

OUR CORE STANDARDS

Every part of a core is important, but the quality of the headers is an absolute must. The tube slots must be punched with a maximum of .002" clearance for a precise tube fit. While others use single sided clad material, AFCO uses double sided clad for all the headers. This provides a fillet joint around the tube on both sides of the header, doubling the strength of the joint. You simply cannot build a better, stronger core. The use of .080 double clad material and extruded side channels provides a core strong enough to handle over one million pressure cycles, without a tube-to-header joint failure.

DOUBLE PASS RADIATORS

LIGHTWEIGHT 1 ROW X 1.5" CORE DOUBLE PASS RADIATORS

AFCO Racing Products is proud to announce our new lightweight double pass radiator for modifieds. This is the easiest and most cost-effective way to shave as much as 10 pounds off the front of your car, allowing you to concentrate ballast and improve handling. The radiator features a new 1.5" thick core for improved air-flow. The new lightweight double pass radiator has the standard features you have come to trust from AFCO, such as furnace brazed tubes with no epoxy. These race-proven lightweight radiators fit the same footprint as our standard radiators and installation is simple with no major modifications needed for mounting.

GAS SHOCKS ALUMINUM

SMALL BODY BULB

63/64 SERIES

Engineered to maximize low speed control and grip, this shock features a low friction, high temperature sealing system. Each shock is hand crafted & dyno tested at AFCO.

- Rebound & compression adjustable shocks available.
- Linear & digressive shock valving.
- Base valve design.
- ½" shaft with minimal rod pressure gain to maximize grip.
- Extra torsion bar clearance.
- Available in 5", 6", 7" & 8" stroke.
- Designed for dirt or pavement.
- Works with Sprint Cars, Mini-Sprints, Midgets, and Micro-Sprints.
- Detailed service/rebuild manuals available.
- Can be used with a remote adjuster.

TWIN TUBE SHOCKS ALUMINUM

SMALL BODY - SINGLE ADJUSTABLE

16 SERIES

AFCO's 16 Series Twin Tube Shocks are an excellent choice for many types of open wheel racing. The twin tube construction enhances driver feel and the deflective disk construction promotes consistency and long-term reliability. These shocks are available in rebound adjustable, and compression adjustable versions. Adjustable shocks feature completely independent adjustments and have a positive detent position indication that helps fine tune the damping. Adjustable shocks can also utilize the optional remote adjuster assembly for fast and repeatable in-cockpit adjustments. The consistent and superior tunability of AFCO 16 Series shocks gives you the winning edge.

**SMOOTH OR THREADED
Rebound Adjustable or
Compression Adjustable**

\$399⁹⁹

ADDITIONAL FEATURES

- Twin tube design for traction in the slickest of track conditions.
- Shim stack technology in a lightweight small-body design.
- Lightweight small-body design that helps decrease un-sprung weight.
- Rebuildable and repairable.
- 1.75" outside diameter.
- Can be made cockpit adjustable with use of part # 20150.

HOW IT WORKS

AFCO's Dual Stage Coil-Over assembly provides variable spring rates that can be used to improve traction and handling in the slickest of conditions. Additionally, the assemblies can help eliminate suspension bottoming problems common with today's open wheel racecars. For use with 1-7/8" small diameter springs. AFCO Dual Stage Coil-Over assemblies use two coil-over springs, a special nylon slider for small body shocks that fits between the two springs. Also, two special, thin-walled nuts are used to jam the slider assembly in order to "stage" suspension stiffness. When the slider assembly (located between the two springs) is free to slide on its shock, the Dual Stage assembly produces a combined spring rate softer than either rate of the two springs used (see combined spring rate formula below).

Spring Rate Formula: Dual Active Springs

Primary Spring Rate X Secondary Spring Rate
Primary Spring Rate + Secondary Spring Rate = **Actual Spring Rate**

Example: $\frac{200\#/in. \times 400\#/in.}{200\#/in. + 400\#/in.} = \frac{80,000}{600} = 133.33\#/in.$

NOTE: The combination of a 200#/in. and 400#/in. spring works the same as a single 133#/in. spring as long as both combination springs are active.

However, the spring rate of the Dual Stage assembly stiffens to that of the primary spring, which remains as the sole, active spring whenever the slider assembly contacts the adjustable Dual Stage jam nuts.

1-7/8" I.D. DUAL STAGE SPRINGS

AFCO's Dual Stage Coil-Over assembly provides variable spring rates that can be used to improve traction and handling in the slickest of conditions. Additionally, the assemblies can help eliminate suspension bottoming problems common with today's open wheel racecars.

DESCRIPTION	RATE	PART #	PRICE
4" DUAL STAGE SPRING	15	29015-3B	\$63.99
4" DUAL STAGE SPRING	25	29025-3B	\$63.99

HOW IT WORKS

AFCO Dual Stage Coil-Over assemblies use two coil-over springs, a special nylon slider for small body shocks that fits between the two springs. Also, two special, thin-walled nuts are used to jam the slider assembly in order to "stage" suspension stiffness. When the slider assembly (located between the two springs) is free to slide on its shock, the Dual Stage assembly produces a combined spring rate softer than either rate of the two springs used (see combined spring rate formula below).

Spring Rate Formula: Dual Active Springs

Primary Spring Rate X Secondary Spring Rate
Primary Spring Rate + Secondary Spring Rate = Actual Spring Rate

Example: $\frac{200\#/in. \times 400\#/in.}{200\#/in. + 400\#/in.} = \frac{80,000}{600} = 133.33\#/in.$

Note: The combination of a 200#/in. and 400#/in. spring works the same as a single 133#/in. spring as long as both combination springs are active. However, the spring rate of the Dual Stage assembly stiffens to that of the primary spring, which remains as the sole, active spring whenever the slider assembly contacts the adjustable Dual Stage jam nuts.

AFCO BRAKES

BRAKE PADS

AFCO proudly offers its line of racing and high performance brake pads. These brake pads have gone through extensive development and testing in the toughest racing environments. Our racing brake pads are derived from the latest materials in friction products and utilize the latest technologies in brake pad manufacturing.

- Improved stopping power.
- High torque with excellent control qualities.
- Exceptional high temperature performance.
- User friendly/easy break-in.
- Exceptional pad and rotor wear.
- Available in seven compounds (C1, 33, C2, 32, 34, Aluminum and Titanium) to fit popular caliper styles.

F88 / SL

COMPOUND C1

6651011 \$200.99

This compound was designed and developed to meet the braking needs of medium to high temperature racing applications. As brake system temperatures quickly increase and decrease, C1 provides consistent performance while remaining very fade resistant. C1 has proven to be extremely rotor friendly and provides exceptional pad life without requiring lengthy pad break-in (bedding) procedures. C1 is widely used in dirt track racing and is the ultimate pad choice for all medium temperature applications. Recommended temperature use: 400 to 900 degrees.

COMPOUND C2

6651021 \$200.99

This compound provides exceptional high temperature performance. C2 is designed to withstand wide-ranging temperature changes, giving the driver predictable pedal feel and excellent control qualities lap after lap. C2 is high in torque value yet has very long pad wear. Compound C2 is the perfect choice for all higher temperature applications. Recommended temperature use: 500 to 1200 degrees.

PILLAR VANE ROTORS

- Designed using premium grade alloys for superb thermal shock stability.
- Machined and double disc ground to assure precise flatness.
- Precise pillar placement for high volume cooling.

- Premium center - split castings reduce stress risers.
- Rotationally machined balanced - CNC.
- 8 X 7" bolt circle.

AFCO COOLING

ALUMINUM RADIATORS

Every AFCO radiator is built from detailed, computer-designed specifications and use precision CNC laser-cut parts for exact tolerances. We never stamp tanks. Our tanks are either laser-cut and precision-welded or formed using a "drawn" technique that keeps a uniform thickness and eliminates weak spots.

AFCO understands the vital role the radiator plays in protecting the investment you have in your car. That is why we make no excuses or compromises in constructing the best aftermarket radiators in the industry. Don't trust your pride and joy to anything less than AFCO quality!

FROM CORE TO FINISHED PRODUCT...

MADE BY EXPERTS

Quality control and strict production tolerances are key to developing a premium product. Controlling these aspects in-house means AFCO radiators are produced to the highest standards without compromise.

100% ALUMINUM CONSTRUCTION

By using a modern furnace-brazed process, all AFCO radiators feature all-aluminum construction without the need for epoxy. Not only does this make for a lighter radiator, but the common material bonding provides for increased thermal efficiency as well.

ADVANCED MANUFACTURING

Our robotic welding cell for high volume production features a new Fanuc Robot and CMT technology. We also have water jet, laser cut, CNC brake and other capabilities. Our engineering professionals use the most advanced platforms, such as CREO, to design the most innovative products in the industry.

PREMIUM QUALITY

AFCO produces high quality radiators and cores. These cores are epoxy free and defect free. Each part goes through our stringent quality control process. We pressure-test every one of our radiators to ensure that our customers will keep their cool on the track.

SPECIAL APPLICATIONS

In-house design and fabrication allows us to conceptualize, prototype, test, and manufacture custom cooling systems for a wide variety of applications. If you have a specialty radiator need, AFCO can deliver.

STATE-OF-THE-ART ALUMINUM BRAZING

FURNACE SPECIFICATIONS

30" Wide Belt
8" Pass Height
18-22 Cores/Hour

STAINLESS STEEL "HOTBOX" DATA RECORDER

Brazing profiles are created for each core based on the total mass weight. The furnace temperatures and belt speeds are adjusted based on feedback from a data recorder. The hotbox ensures a quality braze profile for each core.

FURNACE CONTROLS

The furnace is controlled via a touch screen HMI panel. Each component uses a unique brazing profile that is developed and saved as a recipe. This recipe includes belt speed, zone temperatures, and nitrogen flow. The system software also provides features such as historical brazing data and maintenance scheduling.

OUR CORE STANDARDS

Every part of a core is important, but the quality of the headers is an absolute must. The tube slots must be punched with a maximum of .002" clearance for a precise tube fit. While others use single sided clad material, AFCO uses double sided clad for all the headers. This provides a fillet joint around the tube on both sides of the header, doubling the strength of the joint. You simply cannot build a better, stronger core. The use of .080 double clad material and extruded side channels provides a core strong enough to handle over one million pressure cycles, without a tube-to-header joint failure.

SPRINT CAR RADIATORS

Available in "Thermal Coating" - Call for details.

SPRINT DOWNFLOW RADIATOR

AFCO Racing Products is proud to announce our new Downflow Radiator for Sprint Car applications. This new radiator can be used on both wing and non-wing sprint cars. All AFCO Radiators are 100% TIG-welded with no epoxy used and are 100% pressure tested.

- **Downflow Design.**

- 1.50" outlet.
- 12.4 pounds dry weight.
- 20" wide x 21-3/16" tall x 2" thick.
- Four 10 AN O-ring female fittings.
- Single row 1.50" lightweight performance core.
- All-aluminum, TIG-welded construction.
- Radiator will require a tray in order to be installed.

DESCRIPTION	PART#	PRICE
SPRINT DOWNFLOW RADIATOR	80203N	\$419.99

LIGHTWEIGHT DZUS MOUNT DOUBLE PASS RADIATOR

AFCO Racing Products is proud to announce our new Lightweight Dzus Mount Radiator for Sprint Car applications. This new lightweight radiator can be used on both wing and non-wing sprint cars. This radiator has a dry weight of 12.15 lbs. and clears inside the frame rail hoods. All AFCO Radiators are 100% TIG-welded with no epoxy used and are 100% pressure tested. They also have laser cut mounts for Dzus tabs and can be mounted straight or angled.

- **Crossflow double pass design.**

- Dry weight of 12.15 lbs.
- Single row 1.50" lightweight performance core.
- 1.50" outlet.
- Two 6 AN male fittings and two 8 AN male fittings.
- Laser cut mounts allow for Dzus tabs.
- Can be mounted straight or angled.
- All-aluminum, TIG-welded construction.
- 20.58" wide x 20" tall x 2.05" tanks.

DESCRIPTION	PART#	PRICE
SPRINT LIGHTWEIGHT DZUS DOUBLE PASS RADIATOR	80209N	\$429.99

305 SPRINT TRIPLE PASS RADIATOR

Targeted at virtually every engine and chassis combination, AFCO has hit the mark with two versions of aluminum radiators for Sprint Cars. Our Sprint Car Radiators feature a superior cooling design and all-aluminum construction. The radiators are 100% TIG-welded with no epoxy used. They have two rows of 1.25" tubes, four O-ring female bungs, and a 1.5" outlet. They also have laser cut mounts for Dzus tabs and can be mounted straight or angled.

- **Triple Pass.**

- Two row 1.25" tubes.
- Four 10 AN O-ring female fittings on the driver's side.
- 1.50" Outlet.
- Laser cut mounts for Dzus tabs.
- Can be mounted straight or angled.
- 20.50" wide x 19.75" tall x 3.25" tanks.

ZACK PRETORIUS

QUARTER MIDGET

52 SERIES: QM2 MONOTUBE QUARTER MIDGET SHOCKS

FEATURES

- Vibration Reduction Technology (VRT) enhances driver feel and reduces fatigue.
- Upgraded precision machined internal components provide improved shock consistency.
- Near zero drag sealing system improves weight transfer and driver smoothness.
- New gas chamber components provide near zero rod pressure gain which improves driver feel.
- Comes with coil-over kit. Choice of flat cone or tall cone.
- Schrader valve option offered.
- Fast turnaround time for rebuilds at AFCO.
- Trackside support by many AFCO dealers, authorized shock tuners, and AFCO technicians.
- AFCO technical line available at 800-632-2320 to answer your questions.

\$189⁹⁹

NEW QUARTER MIDGET RACE CAR SPRINGS

**NOW WITH
DURABLE BLACK
POWDER COAT
FINISH!**

- Quarter midget race cars require very precise tuning. This new line of AFCO quarter midget springs is available in 5 lb. increments to help dial in your set-up.
- Spring design was optimized for performance and consistent rate throughout the usable range. This resulted in the best performance to weight ratio of any spring on the market.
- Spring material is of the highest quality and provides consistent heights and rates throughout the life of the spring.
- During manufacturing, each spring is compression set to minimize change in free height during the life of the spring.
- Each spring has the part number engraved by hand on the end as AFCO has done over the last 40 years.

QM 1-5/8" I.D. SPRINGS

- Super strong high tensile steel in a lightweight design.
- Consistent rates throughout full range of travel.
- Lifetime warranty.

AFCOIL LIFETIME WARRANTY

AFCOIL springs are manufactured using the finest spring material available. They are designed for extended life and consistent performance. They are guaranteed to do the job for which they are designed for as long as they are owned by the original purchaser.

COIL-OVER SPRINGS: AFCO will replace any AFCOIL spring that ever exceeds the maximum allowable 1% loss of free height from original nominal specification. One way freight is included.

1. Guarantee applies to original retail purchaser only.
2. Damaged springs not covered by warranty.
3. Spring must be returned to AFCO freight prepaid along with a copy of the original invoice.
4. No other warranty, either expressed or implied, applies to AFCOIL springs.
(Warranty not valid without invoice.)

QM SHOCK ADJUSTMENTS

OPTIONS TO CORRECT A FRONT-END PUSH CONDITION. (UNDERSTEER)

Tight on CORNER ENTRY:

- 1) Increase rebound in L.R. shock.
- 2) Increase compression in R.R. shock.
- 3) Increase rebound in front shocks.
- 4) Reduce compression in front shocks.

Tight in MIDDLE OF CORNER:

- 1) Increase compression in R.R. shock.
- 2) Increase rebound in front shocks.
- 3) Reduce compression in front shocks.
- 4) Increase pressure in R.R. shock.

Tight on CORNER EXIT:

- 1) Reduce rebound in L.R. shock.
- 2) Increase compression in R.R. shock.
- 3) Increase rebound in front shocks.
- 4) Increase pressure in R.R. shock.

OPTIONS TO CORRECT A LOOSE REAR END CONDITION. (OVERSTEER)

Loose on CORNER ENTRY:

- 1) Increase compression in front shocks.
- 2) Reduce rebound in L.R. shock.
- 3) Reduce rebound in L.F. shock.
- 4) Reduce compression in R.R. shock.
- 5) Reduce pressure in rear shocks.

Loose in MIDDLE OF CORNER:

- 1) Increase compression in front shocks.
- 2) Reduce compression in R.R. shock.
- 3) Reduce rebound in L.F. shock.
- 4) Reduce rebound in R.F. shock.
- 5) Reduce pressure in rear shocks.

Loose on CORNER EXIT:

- 1) Reduce compression in R.R. shock.
- 2) Increase rebound in L.R. shock.
- 3) Reduce rebound in front shocks.
- 4) Reduce pressure in R.R. shock.

SHOCK TECH

SHOCK PISTON 101

AFCO's engineering department utilizes the "EMA" dyno to develop new internal shock components, evolve existing shock packages, and prove new technology. The EMA dyno also allows AFCO to "play back" data collected from the onboard data acquisition system. This "playback" function allows the Engineering staff the ability to see the forces being applied to the shock in "Real Time" at any position on the race track.

A low-level view of how AFCO engineers compare on-track data acquisition with state-of-the-art dyno equipment to create the perfect shocks for your race car.

Low Shock Speeds

Helps tune chassis dynamics through the corner to optimize driver feel.

High Shock Speeds

Helps tune chassis dynamics through bumps and ruts, tune quick transitions on and off throttle, and tune quick transitions on and off brake.

LINEAR-LINEAR VALVING

- Reduced Low Speed Forces that promote driver feel.
- Mid to High Speed to control bumps and ruts.

DIGRESSIVE-DIGRESSIVE VALVING

- More low speed control to stabilize car.
- Modifieds use digressive valving on LR compression to slow down travel and maintain roll steer.
- Open Wheel cars utilize digressive valving on LR rebound on mid-exit to drive off corner.
- Pavement Late Models use digressive valving on front shocks with big bar/soft spring setups.

PROGRESSIVE-PROGRESSIVE VALVING

- Soft low to mid speeds to promote driver feel and chassis movement.
- High speed damping to control car over bumps.

NOTE: Any AFCO shock can be made with any combination of these three types of valving. For example: Linear-Linear, Digressive-Linear, Progressive-Digressive, etc.

STREET STOCK - TUNING GUIDE

4-LINK TUNING

TO TIGHTEN

CORNER ENTRY

(off throttle)

- Stiffen LF spring.
- Decrease compression RR shock.
- Decrease rebound LR shock.
- Soften RF spring³.
- Decrease compression RF shock.
- Decrease LS weight %.
- Shorten RS wheelbase/lengthen LS.

CORNER EXIT

(on throttle)

- Stiffen LR spring.
- Increase wedge¹.
- Stiffen RF spring¹.
- Decrease rebound LF shock.
- Decrease rebound RF shock.
- Decrease compression LR shock.

4-LINK TUNING

TO LOOSEN

CORNER ENTRY

(off throttle)

- Soften LR spring.
- Increase rebound LR shock.
- Increase rebound LF shock.
- Stiffen RF spring⁴.
- Increase LS weight %.
- Lengthen RS wheelbase/lengthen LS.

CORNER EXIT

(on throttle)

- Soften LF spring.
- Decrease wedge².
- Soften RF spring².
- Increase rebound front shocks.
- Stiffen RR spring².
- Increase compression RR shock¹.
- Lengthen RS wheelbase / lengthen LS.

1. Can also loosen off-throttle handling.

2. Can also tighten off-throttle handling.

3. Can also loosen on-throttle handling.

4. Can also tighten on-throttle handling.

**OVERALL CHASSIS TUNING
APPLIES TO ALL TYPES OF
CHASSIS:**

To Loosen:
Increase stagger
Lower ballast
Decrease rear weight %

To Tighten:
Reduce stagger
Raise ballast
Increase rear weight %

SPRINT CAR - TUNING GUIDE

NON-WING SPRINTS

SHOCK BASELINE

HEAVY TRACK

- Left Front: 1674-6/1674-6S.
- Right Front: 1675/1675S.
- Left Rear: 1693-9S.
- Right Rear: 1695S.

INTERMEDIATE TRACK

- Left Front: 1675-3/1675-3S.
- Right Front: 1675-3/1675-3S.
- Left Rear: 1693-8S.
- Right Rear: 1695S.

SLICK TRACK

- Left Front: 1675-3 / 1675-3S.
- Right Front: 1675-2 / 1675-2S.
- Left Rear: 1693-7S or 1693-8S.
- Right Rear: 1694S.

**Tuning Note: The amount of Left Rear tie-down may vary by the amount of stagger and driving style. The above shock valvings are baseline suggestions only. The most critical shock to tune with on non-wing sprint cars is the left rear.

WINGED SPRINTS

SHOCK BASELINE

HEAVY TRACK

- Left Front: 1674-6/1674-6S.
- Right Front: 1675/1675S.
- Left Rear: 1694-8S.
- Right Rear: 1695S.

INTERMEDIATE TRACK

- Left Front: 1675/1675S.
- Right Front: 1675/1675S.
- Left Rear: 1694-8S.
- Right Rear: 1694-5S.

SLICK TRACK

- Left Front: 1674/1674S.
- Right Front: 1675-2/1675-2S.
- Left Rear: 1693-8S.
- Right Rear: 1694S.

**Tuning Note: Be cautious of using easy-up front shocks in slick conditions on winged sprint cars. The combination of a rearward mounted wing and easy-up front shocks can reduce front grip to the point of causing an extreme push condition.

QUARTER MIDGET - TUNING GUIDE

SHOCK ADJUSTMENTS

UNDERSTEER TO CORRECT A FRONT-END PUSH CONDITION.

TIGHT ON CORNER ENTRY

- Increase rebound in LR shock.
- Increase compression in RR shock.
- Increase rebound in front shocks.
- Reduce compression in front shocks.

TIGHT IN MIDDLE OF CORNER

- Increase compression in RR shock.
- Increase rebound in front shocks.
- Reduce compression in front shocks.
- Increase pressure in RR shock.

TIGHT ON CORNER EXIT

- Reduce rebound in LR shock.
- Increase compression in RR shock.
- Increase rebound in front shocks.
- Increase pressure in RR shock.

OVERSTEER TO CORRECT A LOOSE REAR END CONDITION.

HEAVY TRACK

- Increase compression in front shocks.
- Reduce rebound in LR shock.
- Reduce rebound in LF shock.
- Reduce compression in RR shock.
- Reduce pressure in rear shocks.

INTERMEDIATE TRACK

- Increase compression in front shocks.
- Reduce compression in RR shock.
- Reduce rebound in LF shock.
- Reduce rebound in RF shock.
- Reduce pressure in rear shocks.

SLICK TRACK

- Reduce compression in RR shock.
- Increase rebound in LR shock.
- Reduce rebound in front shocks.
- Reduce pressure in RR shock.

ELITE PRO
SCALES

LONGACRE®

NEW!

ELITE & ELITE PRO SCALE SYSTEMS

Completely redesigned for 2024 with the latest Bluetooth 5.0 technology to ensure a hassle-free user experience. Extended Bluetooth connectivity provides increased range in any setting, indoor or outdoor. Effortlessly connect your scales to your Android or iOS device with a simplified, but secure, pairing process.

Longacre®
CONNECT

New App Available on
Android and iOS devices.

LONGACRE®

SPORTSMAN™ ELITE GAUGES

The all-new Sportsman™ Elite Gauges take the traditional Sportsman™ gauge to the next level by incorporating SMi™ technology into this updated mechanical gauge. The Sportsman™ Elite Gauge has eliminated the external warning light and the need for any extra wiring. The warning lights are now included in the gauge face. Once your gauge reaches the warning level from the sending unit, the gauge lights up with the warning color. The Sportsman™ Elite Gauge comes equipped with a bright white backlight and a red needle for optimal clarity. Legal in all forms of motorsports and classes.

LONGACRE®

WATERPROOF GAUGES

Engineered for wet and dirty environments, the Longacre® Racing Products Digital Elite Waterproof Gauges and SMi™ Elite Waterproof Gauges provide the absolute best in waterproof sealing. These elite gauges provide the most precise measurements on the market with unmatched resistance to vibration, heat, and moisture.

Digital Elite
Waterproof Gauges
